Recording Process: The vast majority of states in the United States employ a system of recording legal instruments that affect the title of real estate as the exclusive means for publicly documenting land titles and interests. The recording systems are established by state statute. They usually provide for the office of a recorder in each county or other jurisdiction.

Real Property: Real Property is property that includes land, buildings and anything affixed to the land. Real property only includes those structures that are affixed to the land and not those which can be removed such as mobile homes and equipment.

Real Property Records: Real Property Records contain all of the recorded data associated with a particular Real estate. Real Property definition includes many different types of properties such as residential, condominium, commercial, industrial, vacant land, mobile home, and time-shares.

Forms of Property Ownership: Real property can be held in several different methods, which affect income tax, estate tax, continuity, liability, survivorship, transferability, disposition at death, and at bankruptcy.
