Hello Alyssa,

Okay so if the packaging is damaged and the product is damaged too, discard the box and put the damaged product in a new box.

Does that answer the question?

Hi Patricia, I am a little confused about Step #20, in the instructions?
Step #20 says "If the original package is damaged, put the product into a new packaging."
Do we put the damaged package in new packaging?
Or, do we discard the damaged package, then put the product into a new packaging?
I'm not clear on that Step, would you please clarify?
Thank you so much.
