

Is an international company engaged in e-commerce field. Cryptocurrency has its certain set of benefits such as security, confidentiality and privacy, availability and convenience. Nowadays the cryptocurrency market is growing exponentially. There are an increasing number of people who want to invest in cryptocurrency, but few are aware of how to do that. EBIT TECHNOLOGY LLC enables everyone to make safe investments in cryptocurrency. Our vision is to bring cryptocurrency to everyone.

Our service is designed for all people who want to buy, sell or exchange e-currency. We deal with customers worldwide and help them work with e-currency fast and at low fees. We guarantee our clients secure and easy cryptocurrency exchanges and transfers. The company operates only with major legal e-currencies, such as Bitcoin, Ethereum, Litecoin and Cardano. Our service makes it possible for people to exchange their money for any e-currency at the best rate available and transfer it as easily as sending an email. Moreover, we provide an opportunity to advance funds to the beneficiary's e-wallet at his/her request.

We enable our customers to buy, make overseas payments and track those payments 24/7. International bank transfers take a few days, while e-currency reaches its destination within seconds. We convert money to the required e-currency and ensure that it reaches the recipient as soon as possible. As a rule, customers convert funds into e-currency when they want to make instant international payments. In that case we provide them with a full service and forward funds directly to the recipient. This service combines fast payments with low commission.

We believe good support is second only to security and follow the best security practices and processes in the industry. We work hard to stay ahead of the curve and offer a personal touch to all our clients, which is why so many come back to our service again.
