As a Quality Control Associate – you will be tasked with managing orders, perform a quality control inspection on each order, and check order details for accuracy. A Quality Control Supervisor will be assigned to you, and you will be reporting directly to them.

Your primary responsibilities will be:

Managing shipments:

- Arranging package deliveries and pick-ups.
- Shipping out packages.

Quality Control Inspection:

- Inspecting each package for damages.
- Inspect the contents of the package.
- Confirm that the product quantity corresponds.
- Remove and recycle any original invoices or packing slips.
- Input your inspection data on your Control Panel.

All orders that have been received during the week—must be processed and shipped out until Friday.
